CONGRESSMAN DAVID WU SELECTED FOR ENERGY AND SPACE SUBCOMMITTEES

Wu selected to serve on Science Subcommittees

Washington, DC – Congressman David Wu today was selected to serve on the House Science subcommittees that address space issues and energy issues.

"I am pleased that to be appointed to these two subcommittees," said Congressman Wu. "As we look toward developing responsible energy policy that will affect us in the Northwest, it is important that Oregonians have a seat at the table."

The **Energy Subcommittee** has jurisdiction and general and special oversight and investigative authority on all matters relating to energy research, development and demonstration including: Dept. of Energy research, development, and demonstration programs, Dept. of Energy laboratories and science activities; energy supply activities; nuclear, solar and renewable energy and other advanced energy technologies; uranium supply, enrichment, and Dept. of Energy waste management activities as appropriate; fossil energy research and development; clean coal technology; energy conservation research and development; energy aspects of climate change; and energy standards.

The **Space and Aeronautics Subcommittee** has jurisdiction over all matters relating to astronautical and aeronautical research and development including: national space policy, including access to space; National Aeronautics and Space Administration (NASA) and its contractor and government-operated laboratories; space commercialization, including the commercial space activities relating to the Dept. of Transportation and the Dept. of Commerce; exploration and use of outer space; international space cooperation; National Space Council; space applications, space communications and related matters; earth remote sensing policy; civil aviation research, development and demonstration; research, development and demonstration programs of the Federal Aviation Administration; and space law.
